EDUCATION

B.Tech in Artificial Intelligence & Data Science, A.D Patel Institute of Technology State University

Expected 2026

CGPA: 8.5

SKILLS

Languages	C++, C, JavaScript, Python, Java, HTML, CSS, PostgreSQL, SQLite3, MongoDB, Appwrite
Frameworks	Spring-SpringBoot, Next.js, React, Django, Flask, Node.js, Express (MERN), REST APIs,
Tools	Git, WordPress, Canva, Heroku, Android Studio
Soft Skills	Time Management, Teamwork, Communication, Problem Solving, Critical Thinking

WORK HISTORY

Software Developer Intern
Softwerido Solutions

April 2025 – Present

- Contributing to the backend development of a dynamic e-commerce platform, focusing on API design, feature implementation, and system integration.
- Working on scalable service architecture, integrating third-party tools, and ensuring robust data flow across modules.
- Collaborating with the engineering team to identify performance bottlenecks and improve system efficiency through clean, maintainable code.

Website Developer & Graphics Designer Intern
Warble Solutions

July 2023 – Feb 2024

- Led the end-to-end development of a corporate website, live at [Adaptive Engineering](#), combining responsive design with functional user experience.
- Created custom UI designs and graphics aligned with client branding, contributing to a professional and cohesive web presence.
- Gained practical experience in client collaboration, design iteration, and production-ready web deployment during a 7-month internship.

PROJECTS

CloudVault

[Live](#)

- Developed CloudVault, a Google Drive clone, as part of a learning initiative to explore modern web technologies.
- Built using Next.js, Appwrite, TailwindCSS, and ShadCN, and deployed on Vercel.
- **Key Features:**
 - Passwordless Login: Implemented secure OTP-based authentication for seamless user access.
 - Real-time Cloud Storage: Enabled users to upload, delete, and organize files with real-time updates using Appwrite's cloud services.
 - Responsive UI/UX: Designed a modern and intuitive interface with TailwindCSS and ShadCN for consistent branding and usability.
 - Secure File Handling: Incorporated robust backend logic for secure storage and file management.

- Deployed on Vercel: Leveraged Vercel's serverless platform for fast and reliable deployments.

Library Management-Final's of Odoo Combat

[GitHub](#)

- Created a Library management system for the Finals of Odoo Combat 2024.
- Implemented full backend using Node.js and Express with MongoDB as database.
- Designed and integrated multiple React components for an Odoo-themed UI.
- **Key Features:**
 - Fully protected admin access using JWT tokens and component tree.
 - Real-time API usage with cloud hosting.
 - Integrated mail system for real-time updates.

Real Time Crime Reporting

[GitHub](#)

- Created real-time mapping and crime reporting features for Odoo Combat 2024.
- Developed live heatmaps for real-time crime updates.
- Secured the app with role-based access and implemented OAuth via Google login.
- **Key Features:**
 - Real-time updates of crime incidents.
 - Optimized APIs for efficiency.
 - Used React-Leaflet for improved accuracy.

ERP System

[GitHub](#)

- Developing an ERP System using JavaScript and the MERN stack.
- Implementing PostgreSQL for data management.
- Designing complex database structures.
- **Key Features:**
 - User management system for administration.
 - Integration of various modules for business process management.
 - Streamlined UI/UX design using HTML, CSS, and Tailwind-CSS.

User Management

[GitHub](#)

- Developed a Django project for role-based user management.
- Implemented SQLite3 for database management.
- **Key Features:**
 - Role-based user management system.
 - Integrated authentication and authorization mechanisms.
 - User-friendly UI using HTML and CSS.

EXTRA-CURRICULAR ACTIVITIES

Actively participated in various hackathons, achieving finalist positions in Odoo Combat and CVMU Hackathon. Backend tutor in college club, mentoring students in programming and project development.
